—The Passing Show.

Sudden Death of Dr. Rosenkrans

It is with deepest regret that we announce the death of Dr. L. W. Rosenkrans, which occurred last Monday night, August 1st, in St. Paul's Hospital, Saskatoon, at the age of forty-six years.

The habitually healthy sometimes become over-confident of their strength. So it proved with our friend the Doctor. Not until his alarmed friends refused no longer to be denied, would the Doctor consent to call in medical assistance, and on Saturday doctors in neighboring towns were sent for. Following a consultation by Doctors Mason of Hanna, and Charter, of Oyen the patient, attended by Dr. Charter and Nurse Mitchell, was sent to St. Paul's Hospital, Saskatoon; but all that the most skilled could do failed to check the development of peritonitis, and the Doctor passed away very soon after his arrival at the hospital.

In the passing of Dr. Rosenkrans this district loses one of its most worthy citizens. A graduate of Pennsylvania University, his medical skill has been at the service of the people of this district for some seven years. In activities that make for social uplift he spared neither time nor money. When we recall the the Christ's words—"I am among you as one that serves," We gladly accord the departed a place among those who followed the Great Physician.

A memorial service will be held in the Chinook Methodist Church on Sunday evening next at 7.30.

Mrs. McPherson, who has been visiting at the home of Mr. and Mrs. R. R. Dunn, returned to her home in Winnipeg on Wednesday morning.

A baseball match between the Cereal team and Chinook will be staged on the Fair grounds on Friday next.

Don't forget Chinook's Agricultural Fair. Big day to-morrow. Large number of entries.

BIG ATTRACTIONS AT THE FAIR FRIDAY

Good Program of Sports

Tomorrow will see one of the best fairs ever held in the Chinook district. From the way entries are pouring in there is every indication that there will be a fine exhibit of live stock and farm produce.

Among other attractions there will be a good program of sports including races for old and young. The following is the program:

Half mile foot race, 1st, \$5.00; 2nd, \$3.00; 3rd, \$1.00; 100-yard dash, \$4.00, \$3.00, 1.00. Hop-step and-jump, \$3.00, \$2.00, \$1.00. Long Jump, \$3.00, \$2.00, \$1.00. Putting 14-lb weight, \$3.00, \$2.00, \$1.00. Single Ladies' Race, 18 years or over, \$2.00, \$1.00, 50c. Married Ladies' Race, \$2.00, \$1.00, 50c. Boys' Race, 8 years and under, 75c, 50c, 25c. Boys' Race, 14 years and under, \$1.00, 50c, 25c. Pillow Fight, 17 years and under, \$2.00, \$1.00, 50c. Pillow Fight, 18 years and over, \$2.50, \$1.00, 50c. Girls' Race, 8 years and under, 75c, 50c, 25c. Girls' Race, 14 years and under, \$1.00, 50c, 25c. Girls' Race, 17 and under, \$1.00, 75c, 50c.

Among the other attractions will be some very good horse racing and baseball.

The members of the Chinook Women's Institute have rented rooms from Mr. Hinds next door to the butcher shop for the purpose of a Rest Room for the ladies visiting the fair. Every one is welcome to take advantage of the comforts afforded. The members of the Institute also intend to serve luncheon at moderate charges.

Here is something convenient: All exhibitors who send in a written statement of entries on or before Aug. 4, may bring in their exhibits early on the 5th provided they are there and placed by 9.30 a.m. Absolutely no exhibit received later.

Remember: No exhibits shall be removed till after 5 p.m.

An Emerson district farmer began cutting wheat on July 18th. This is a new record for early harvesting in Manitoba. The wheat was sown on April 22nd. Oat cutting began July 15th.

The Menace of Bolshevism

During recent months, reference in the press of Canada to the activities of the radical socialist Bolshevik and Communist movements have not been as frequent as was the case a year or so ago, but this does not mean that the menace to our free British institutions has passed. Notwithstanding the anxieties and arduous duties at present imposed on the statesmen of Great Britain because of the troubles in Ireland, the complex problem of world disarmament, and the gigantic financial difficulties to be overcome following the war, leaders in government in the Old Country are not overlooking the danger that still threatens from the Bolshevist propaganda.

A committee of the House of Lords, under the chairmanship of the Duke of Northumberland, spent several months of investigation and research into the activities of these revolutionary organizations and in a report recently issued it is stated that there is overwhelming evidence that an international conspiracy exists which aims at the destruction of all existing institutions of government and society, of all religion, of all moral laws, and all property rights, throughout Great Britain, Canada and other Overseas Dominions.

This report sets forth that the main points in the Revolutionary programme are:—

(1) The national power of Great Britain and other Allied States is to be broken down by the fomenting of internal revolutions, through appeals to class hatred, and by efforts to obtain greater freedom and privileges for one class of people. Governments which are strong are to be weakened by the introduction of Socialism, which will pave the way to anarchy.

(2) Internationalism is to be taught.

(3) In every possible way influence is to be secured over public officials. As religion is the moral mainstay of all government, it is to be destroyed.

(5) Property owning is to be rendered impossible—by means of a thousand laws, restrictions and taxes, thus bringing about some form of State Socialism, or Communism, or Anarchy.

The Communist Party, directed and subsidized from Moscow, exerts its power through magazines and printed matter, inculcating ideas of Red Revolution into the minds of the people, and by a process known as "boring from within." Communist schools have been established for perverting the young by the teaching of Communism and Atheism. In this connection it is important to note that there are over twenty weekly newspapers in Canada teaching and preaching Socialism and Communism, many of them of the most radical kind.

Despite all his many other duties and responsibilities, David Lloyd George, who is a radical of the sane and progressive type, felt impelled recently to sound a word of warning as to the danger that confronts British institutions from this subtle enemy. The British Prime Minister is reported as saying:

"The military danger is over, but there are greater, more insidious, more permanent dangers still remaining—the dangers that have arisen from the new conditions in this and every land, the new ideas that have arisen, the new organizations that have suddenly risen into great powers. What is the peril? It is the phenomenal rise to power of a new party, with new purposes of the most subversive character. It calls itself Labor, but it is really Socialism."

"If anyone doubts the reality of the danger, I would ask him to read the Socialist and Labor papers. We rarely see them, and we do not quite see what they are after, but what they write in these papers is repeated on hundreds and thousands of platforms, to hundreds and thousands and millions of people. And they are beginning to believe it. 'Socialism is fighting, and you will find it in these papers—to destroy everything that great prophets and leaders labored for generations to build up. Private enterprise, individual effort, the stimulus of reasonable gain, the present organization of communities, of industry, of credit—all that goes if this new system which is being preached, succeeds. Even the political liberty which they build up is being threatened.'"

The old and tried Labor organizations of Canada and the United States are aware of the danger which threatens and are out combating it. The business communities are becoming more and more aware of it. It is time the average man who loves the little home he has built up by patient effort and self-denial, the man with his quarter or half section of land, the men and women who know that in the public school and the church are to be found the real safeguards and guarantees of personal liberty and real political freedom, should bestir themselves and vigorously oppose this enemy to all that is dearest and best in life.

Clergyman's Peculiar Request

Left Directions in Will For Vault of Polished Stone.

Peculiar directions for the construction of his grave were given in the will of the Rev. Francis Minnit of Torrington Square, who left property worth £14,074. He wrote: "It is my wish to be buried in a vault with cement and 14-inch brickwork, or in stone, for which more than the usual ground must be taken, so that the dimensions of the interior may be ample. This vault should be cellar-aid, and, if possible, drained, the cellar being floored with slate polished on both sides, or stone flags so polished. Any shelves should also be of like material, and permanently fixed in the structure, access to the vault being provided either from a central passage from the front or side, provision being made for drainage in every case, as I do not approve of the iron girders used to separate coffins.

Knew His Name

The Poet Whittier's Dog Was An Intelligent Animal.

During one of the last birthday celebrations of the poet Whittier, he was visited by a celebrated oratorio singer. The lady was asked to sing, and, seating herself at the piano, she began the beautiful ballad, "Robin Adair." She had hardly begun when Mr. Whittier's pet dog came into the room and, seating himself by her side, watched her as if fascinated, and listened with a delight unusual for an animal. When she finished he came and put his paw very gravely into her hand and licked her cheek. "Robin takes that as a tribute to himself," said Mr. Whittier. "He also is a 'Robin Adair.'" The dog, hearing his own name, evidently considered that he was the hero of the song. From that moment, during the lady's visit, he was her devoted attendant. He kept by her side when she was indoors, and accompanied her when she went to walk. When she went away, he carried her satchel in his mouth to the gate, and watched her departure with every evidence of distress.—St. Nicholas.

PAINFUL DIARRHOEA

CRAMPS IN STOMACH

Mr. Fred Fouston, Craik, Sask., writes:—"A year ago last harvest I was taken with a sudden attack of diarrhoea which completely laid me out, and in a few hours I had to quit work. The cramps in my stomach were dreadful, the loads of perspiration would stand out on my face at times I was in such great distress. At last I got a chance to send to town for a couple of bottles of Dr. Fowler's Extract of Wild Strawberry. I used it according to the way I felt and soon obtained a great change for the better, for which I was very thankful. I don't know what the cause of my sickness was except the extremely hot weather and the active work of stooking the wheat."

Several of my neighbors were taken the same as myself and had the doctor attend them, but they didn't get any great relief until I advised them to use "Dr. Fowler's," when they were experienced a great change. Dr. Fowler's Extract of Wild Strawberry has been on the market for the past 76 years and many cheap imitations are being offered to the public.

Be sure and get the genuine put out by Dr. T. M. Fowler, Ltd., Toronto, Ont. Price, 50c a bottle.

The Chinese are ahead of the world in the preparation of roast pork for the table. After it has come out of the oven, it is hung in the smoke of various aromatic herbs, which gives it a delicious flavor and renders it of a palatable nature.

SUMMER HEAT

HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly unless promptly aided is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera, infantum, dysentery and colic are most prevalent. Any one of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, soothe the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Successful Family

He was a young artist, and although a very gifted man, the world had not yet recognized what a man they had amongst them.

Still, success was coming his way little by little, and he was proudly telling his life story to a patron. "A few years ago," he asserted, "I was quite unknown, but now my work is hung on the line!" Then a bitter thought flitted through his brain, and he added: "So is my wife's."—London Answers.

Monuments To "Bobby" Burns. Robert Burns has had more statues erected to his memory than almost any other person outside of royalty. In the United States there are monuments to the poet in New York, San Francisco, Chicago, Boston, Atlanta, Denver, Milwaukee, Elber, Albany and Barry, N. Y. Other monuments are in Edinburgh, Glasgow, Dumfries, London, Belfast, Toronto, Melbourne, Adelaide, Sydney and Fredericton, N.B.

Drink Water When Thirst.

Dr. Eliza E. Mosher urged lately the members of the Women's Medical Society of New York, to drink a glass of water at 10 a.m. and others at 3, 4 and 5 p.m. This, she told them, would dilute the products of fatigue which were entering the blood and causing the tired feeling.

How To Cook Fish

BY LORETTO C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

Once even a man lucky enough to catch fish in waters where fish are scarce confessed to me that he did not really know how to clean, prepare and cook the fish he was lucky enough to catch.

If the fish is to be broiled, it may be split. If it is a small fish, or is to be baked, it may be cleaned without splitting. Make a small incision with a sharp knife on the underside between the gills. Split the finger in, loosen and remove the entrails.

Wash the fish inside and out with a cloth wrung out of salt water. Soaking improves the flavor of fish and some of the food value or nutriment is lost in the water in which the fish soaks. Therefore, wipe the fish out, or rinse it quickly under running water.

Lacking in connective tissue, fish is easily broken. It must, therefore, be handled much more carefully than meat. If the fish is to be broiled over the coals, grease the wire broiler thoroughly with a bit of salt pork. Broil out side for a few minutes and then turn so as to broil the skin side.

The fish should be rubbed with oil or melted butter and lightly salted before it is broiled. To broil by gas, put fish skin side up, on a well-greased roasting pan. Broil ten or fifteen minutes, according to the thickness, without turning.

Broiled fish should be served with melted butter and slices of lemon. It may be garnished with parsley or watercress.

Panned fish is popular, especially among campers who must make the most of the frying pan or spider. Small fish, such as perch, are suitable for pan-frying. Clean the fish as previously directed and rub a little salt over it. Then, put into it as a small flour as it will take.

Set it aside for a few moments and then put in some more flour. Try some small ones. Remove bits when the fat is smoking hot, turn the fish into it. Turn it carefully with a pancake turner.

Live crabs should be plunged into rapidly boiling salted water. They should be boiled until a deep red. Before serving, large claws should be cracked to facilitate eating. The spongy undesirable portion should be removed.

Soft shell crabs may either be broiled like fish, or they may be rolled into flour, then into beaten egg to which a tablespoon of milk has been added, and lastly into fine, sifted bread crumbs. They should be carefully lowered into deep fat hot enough to brown a cube of bread in forty seconds.

Who Won the War?

Field Marshal Who Rose From Ranks Supplies Answer.

Erected on the historic New Green, which adjoins the Royal Botanical Gardens, a memorial cross was unveiled the other afternoon by Field Marshal Sir William Robertson in memory of the 96 men of the parish who fell in the war. Referring to Kew's record, Sir William pointed out that there were 61 members in the football club when the war broke out, and, at the end of the year 1914, 59 were in the army, and the remaining two had been declared medically unfit. He thought that was a record throughout the country. It was sometimes stated, Sir William went on, that the war had been won by some particular commander, a general, a political leader, or, it might be, the tanks. That was not the truth. The war, he declared, was won by the strong public opinion of all classes of the nation, gallant men, fighting as of old, "shoulder to shoulder, and blade by blade." Sir William insisted that the suggestion, that "England was slipping back" should be rejected, and, in the name of those who had fallen in all the theatres of war, he urged that we should carry on in the same way as those who died that we might live would have done. Dedicatory prayers were said by the Archdeacon of Maidstone, the Rev. J. B. Macmillan. Sir William Robertson, it may be recalled, has a most romantic career. He rose from the ranks.

Lapis lazuli was the only stone of any intrinsic value known to the Egyptians under the Pharaohs.

A London policeman is not permitted to marry without the approval of his superior.

Through the sense of smell deer can detect the presence of man or wolf from a distance of two miles.

Saskatchewan Grain Man Found Operation Was Not Necessary

"I was doubtful about Tanlac until I tried it myself and now I know it does everything that is claimed for it," said Jacob Popp, well-known and prosperous grain grower of McNutt, Sask.

"I had a bad form of stomach trouble for sixteen years, which was steadily growing worse as time passed. I did not dare eat heavy food or pastry and at times I couldn't retain a thing on my stomach, not even a glass of water. I would bloat up with gas until my heart would beat like a trip-hammer and I used to have awful pains in my chest as well as in the pit of my stomach. My liver was all out of order and I was bothered a

good deal with headaches. I was in such a bad fix I could scarcely sleep at night or work during the day. In fact, I spent two weeks in the hospital and thought an operation was going to be necessary. Luckily, the operation was deferred and as soon as I left the hospital I began taking Tanlac.

"I can hardly realize that so little medicine could do as much good as Tanlac has for me. Although I took only three bottles, I gained twenty-eight pounds in weight and am eating, sleeping and working better than I have in many years. Tanlac is truly a remarkable medicine."

Tanlac is sold by leading druggists everywhere.

The Keeping Of Poultry

Still Walking

Pamphlet Tells How Poultry Can Be Made to Pay.

If resident in either town or country and you wish to know how best to keep poultry and secure the most satisfactory results, consult a pamphlet treating of the subject prepared by the Dominion Poultry Husbandman, F. C. Elford, and recently issued by the Department of Agriculture at Ottawa. The pamphlet can be had free on applications to the Publications Branch. It tells of how poultry can be made to pay, how the birds should be housed and fed, how they should be treated in winter and summer, how to commence keeping in a small way, the equipment that is desirable, how to choose a breed, how to hatch and rear, and how to gather, keep, or market the eggs. In short all the essentials to success in poultry keeping for home consumption or selling are clearly and explicitly explained. In the term poultry are included turkeys, geese, ducks, guinea fowls and pigeons, the raising and care of which are fully discussed. Numerous illustrations of types of birds, and of methods of housing and feeding contribute to make the pamphlet an invaluable compendium on poultry-keeping and marketing.

Unfit To Live—Must Die

This verdict is rendered a thousand times every week—no corn can live, it must pass out, drop off, if Putnam's Extirpator is applied to corns and warts. Use the old reliable "Putnam's" it never fails, 25c at all dealers.

The "highborn" girl was talking "Think of it," she said. "Imagine those Spanish pirates going 3,000 miles on a galleon!" "Yes, dear," said the proficients who, "but you can't believe all you hear about those foreign cars!"—London Tit-Bits.

Screening the plants from certain effects of sunlight, the English horticulturist has produced purple nasturtiums, a color heretofore unknown.

Minard's Liniment for Burns, etc.

Salmon skin is about the best waterproof material that can be worn. The Eskimos use it for both shoes and skins.

"COLD IN THE HEAD"

Is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find the use of HALL'S CATARRH MEDICINE will build up the mucous membrane, be able to resist repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Clever Men Have Small Brains.

The size of the brain is no index to its mental capacity. The heaviest brains on record have been those of persons of low intelligence, while many of the world's cleverest men have had brains well below the average in weight.

For Burns and Scalds—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every case, when so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cure altogether.

Wants Only Single Lady Teachers.

Married women teachers on the staff of the Edmonton School Board will be held provisionally till the end of the year. No more will be engaged and those now drawing salary will have to make way for single women if the latter are available.

A town cannot grow without business. By helping your local dealer you assist the community.

Minard's Liniment for Dandruff

Edward Payson Weston Once Walked 500 Miles in Six Days.

Edward Payson Weston, the pedestrian who was famous a generation ago for his wonderful walking feats, is still hale and hearty at the age of eighty-two years, so a newspaper paragraph states. Even now he walks three miles daily for his mail and several times a week takes a twelve-mile walk in the neighborhood of his home, Plutarch, Ulster county, New York, just to keep himself in condition. Weston once walked 500 miles in six days, and 5,000 miles in 100 days.—Outlook.

A Poe to Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back. There is no half way measure about this remedy. It goes right to work and gives prompt relief. It reaches the innermost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

His Constitutional Rights.

A salesmanship looking inspector stopped over night at a small town Kansas hotel and was surprised to find a dirty roller towel in the washroom. Indignantly he said to the landlord, "Don't you know that it has been against the law for years to put up a roller towel in this State?" "Sure I know it," replied the proprietor, "but no ex post facto law goes in Kansas, and that there towel was put up before the law was passed."—Topeka Capital.

The black cat is almost universally considered lucky.

Minard's Liniment Relieves Neuralgia

Japan and Newfoundland are the only countries that have put flowers upon their postage stamps. The cause of all their trouble and Newfoundland introduces a bouquet of thistle blossoms.

ASPIRIN

"Bayer" is only Genuine

Warning! It's criminal to take a chance on any substitute for genuine "Bayer Tablets of Aspirin," prescribed by physicians for twenty-one years and proved safe by millions. Remember you see the name "Bayer" on package or on tablets you are not getting Aspirin at all. In every Bayer package are directions for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Made in Canada. Aspirin is the trade name (registered in Canada), of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

W. N. U. 1379

Have you noticed how many of your neighbors have changed from tea or coffee to

INSTANT POSTUM

The smooth, rich flavor of this cereal beverage appeals to the taste, and it is free from any element of harm. Better nights and brighter mornings usually result from Postum in place of tea or coffee.

"There's a Reason"

British Embargo On Canadian Cattle Based On A False Claim

Ottawa.—"I think we have shown them in a most conclusive manner that there never has been, and is not likely to be for many years, any disease among Canadian cattle," was how Dr. S. F. Talmie, minister of agriculture, expressed himself to the Canadian Press on his return from England, whither he went at the instance of the Canadian Government to testify before the British commission which recently heard evidence in regard to the question of removing the embargo on Canadian cattle going into England. "It is impossible to make any statement at the present time as to the probable outcome of the work of the Lord Finlay commission," was all that Dr. Talmie could say when asked if he thought his mission to the old country would be successful.

Dr. Talmie said he had made it perfectly clear that the British embargo against Canadian cattle had been instituted on an entirely false claim. The embargo was placed on the assumption that pleuro-pneumonia existed among Canadian cattle 37 years ago. After a most thorough investigation, this charge had been completely exploded. It rested with the British authorities as a matter of honor to take away this restriction made against Canadian cattle.

If the British authorities wanted to exclude Canadian cattle, all well and good; that was entirely their own business. But if such a course was to be adopted, let it be made plain that it was not because of any taint of disease.

An important statement by Dr. Talmie was that international trade was being discussed with the keenest interest by all sections of the community. In 1923 an exhibition was planned at which every portion of the Empire would be represented, and at which the main idea would be to get the component parts of the Empire to better understand each other's trade requirements. The conclusion of the minister was that the exhibition would have the effect of educating people to the idea that the British Empire has the ability of becoming self-supporting.

Dr. Talmie visited the Royal Agricultural Show at Derby, and was deeply impressed at the size and strength of the draft horses. At the Olympia Horse Show he saw some specimens of horses which he regarded as perfect, and the hunters and saddle class were of the highest type.

Circassians Kill Turkish Governor

Constantinople.—Circassian bandits appeared in Karabogha, on the Sea of Marmora, 35 miles east of Gallipoli, raided the town and killed the Turkish governor and commander of the gendarmerie. A British detachment assisted the Turks in pursuing the bandits. As a result of this incident the British are reinforcing the Dardanelles garrison.

26,054 Canadians in Chicago. Washington.—Figures announced by the census bureau give the number of Canadians resident in Chicago at 26,054.

Divergence In Viewpoints Between France and Britain Over Question Of Silesia

London.—The French Government deems it impossible to decide on the holding of a meeting of the Allied Supreme Council until the question of sending reinforcements into Upper Silesia has been decided.

M. de St. Austaire, the French ambassador here, called on Lord Curzon, the British foreign minister, and conveyed this information in the name of his Government. The French notification is regarded here to indicate a serious divergence in the viewpoints of the two countries. It is stated Lord Curzon merely took

Alberta Farmer Ministry

Retiring Administration Is Busy Winding Up Affairs.

Edmonton.—The transfer of the Alberta Government to the incoming farmer administration will not be made until about the middle of August, according to the present outlook. Premier Stewart says there is still a considerable amount of departmental business to close up and he will take another two weeks to put it fully in shape for turning over to the new government. Nothing will be in any case until Premier-elect Greenfield signifies his readiness to assume office.

As soon as he has drawn up his cabinet, Mr. Greenfield will presumably lay it before the members for their consideration and when finally agreed upon the usual procedure to the Lieutenant-Governor will be followed out.

Premier Stewart, in an interview with the Canadian Press, said that in his opinion, the farmer members had made a wise selection in the person of Mr. Greenfield, who he thought would give good service as leader of the new government.

U. S. Reduces Army To 150,000 Men

Congress. Refused Funds to Pay Greater Force.

Washington.—Reduction of the United States army to a peace-time strength of one hundred and fifty thousand men has been accomplished in accordance with the decision of Congress when it refused to appropriate funds for pay of a greater force after October 1. With the reduction, Secretary Weeks announced there would be a general redistribution of troops, practical abandonment of seven of the great war-time army cantonments; placement of many organizations on the inactive list, and skeletonization of others into materially reduced strength.

Quebec Crop Is Fifty Per Cent. Less

Farmers Optimistic Although Drought Damaged Hay and Cereals.

Quebec.—"I still believe there is a decrease of at least 50 per cent. in the crop of the year," stated Hon. J. E. Caron, minister of agriculture, just returned from an automobile trip on the southern shore where he personally inspected the crop. "Not only hay but cereals are greatly damaged by drought. The potatoes look well and vegetables should be an average crop. I found the farmers were optimistic, however, and they are courageously taking means to meet the situation," Mr. Caron added. "Due to our advice, farmers will keep their dairy cattle and will use all the fodder available but it is hoped that the Federal Government will consent to grant a reduction in the freight rates to meet the requirements as the department of agriculture has received offers from the western provinces to send hay here if needed at a very reasonable price."

Britain Cancels Government Bonus.

London.—The chancellor of the exchequer announced that after September 30 no bonus will be paid to government employers in receipt of salaries over £2,000 a year. He also stated that there would be reduction of 5 per cent. on salaries above £500. He said that £500,000 will be saved by these economies.

Turks Are Badly Defeated

Athens.—Information from all sources indicates that the resistance of the Turkish nationalists in Asia Minor is completely broken down, the Greek official news agency declares in a statement. The Turkish losses in killed, wounded and prisoners to date are estimated at 60,000. The Greeks, the statement says, are constantly pressing the Kemalists along the road to Angora. Along the route of their retreat the Turks set fire to stores of material which they were unable to take with them because of the rapidity of their flight.

Auto Accident Wipes Out Family

Autoists Mailed By Car Being On Wrong Track.

Cleveland.—Five persons were killed, four of them almost instantly, when a car on the Abbey Avenue viaduct and an automobile crashed head on. One family was wiped out when John M. Francey, 40, a garage owner, his wife, 37, and their two children, were killed. Each of the dead sustained a fractured skull.

The cause of the accident according to the police, was the operation of a shuttle car east on a westbound track, the eastbound-track being under repair. The motorists were westbound and when they saw the street car on the westbound track they apparently thought it was travelling in the same direction as their automobile.

Terrible Experience Of Mountain Climbers

Mrs. Stone Is Rescued After Undergoing Incredible Hardships.

Calgary.—The search party which discovered Mrs. Stone has forwarded meagre details of the accident to the Alpine Club in Banff.

Mrs. Stone, who is not much the worse for her terrible experience, reports that she and Dr. Stone were climbing Mount Eon and Dr. Stone in attempting to make a short cut started up Rock Chimney with Mrs. Stone following him. They were not roped together. About half way up the rock on which he was standing gave way, and he plunged over her head to his death on the cliff below.

Mrs. Stone attempted to go down to her husband and became marooned on a narrow ledge of rock about half way down, from which she was unable to move. She remained there for five days without food. The only water she had was from a small stream which trickled down the mountain side at noon when the snows above melted. When discovered Sunday night by a searching party she was in a weakened and exhausted condition but uninjured. A. O. Wheeler, president of the Alpine Club, went up to the camp on Marshall Creek, accompanied by a nurse from Banff.

Will Pay Loan Without Borrowing.

Ottawa.—Sir Henry Drayton, minister of finance, announced that the \$15,000,000 due in New York on August 1 would be paid without any further government borrowing.

WESTERN EDITORS

C. W. Holmes, Publisher of the Herald, Carlyle, Sask.

Rainmaker Has Scored

Hatfield Wins Rain Bet With Medicine Hat District.

Medicine Hat.—Rainmaker Charles St. Hatfield has won his bet with the Medicine Hat United Agricultural Association and he will be paid \$8,000 for rain which has fallen in the district during the past three months.

Hatfield was to receive \$8,000 if four inches of rain fell between May 1 and July 1. Up to Saturday last four and one quarter inches had been recorded and so Hatfield draws the maximum payment, which will be made him at the end of the month.

The association will hold a meeting to determine whether or not the contract shall be renewed for another year. Despite the outcome of the unusual contract which was made with the rainmaker, all are not convinced that Hatfield is entitled to take responsibility for the precipitation. It is pointed out that the rainfall did not come at the time it was most needed, and further that whenever the rain did come, it was general throughout the west.

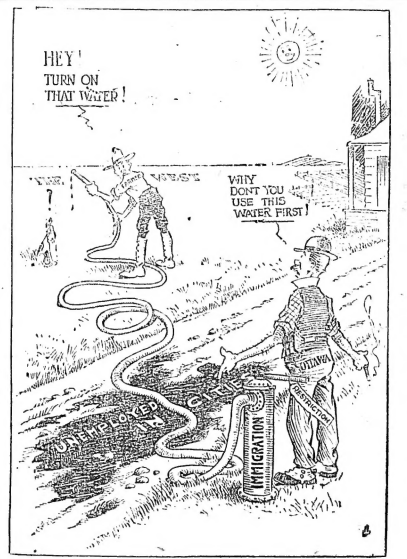

Turk Nationalists Asking For Peace

Resistance In Asia Minor Said To Be Broken.

London.—Mustapha Kemal Pasha, head of the Turkish Nationalist Government, has sent a telegram to Constantinople asking that the Central Government intervene with the Allies in an effort to obtain a cessation of Greco-Turkish hostilities, according to a despatch from Constantinople to the Exchange Telegraph Company.

Wheat Field To Table In Few Hours

Ingersoll, Ont.—A record in which the harvester, the miller and the baker figured, was established a few days ago at Thamesford, Ont. On Thursday, at 3 o'clock, wheat was standing in the field. Later in the day it was threshed, drawn to the gristmill at Thamesford and ground into flour. On Friday morning biscuits of excellent quality were made and placed on the table for dinner.

The West! Yes, But Water in a Puddle Isn't Water on the Land.

Federal Authorities Discourage Immigration At The Present Time

Courts Intervene In Military Execution

Say Sinn Feiners Should Have Been Tried By Court Martial.

Dublin.—An important judgment was delivered in the chancery division when the master of the rolls ordered a writ of habeas corpus, returnable against General Sir Neville Macready, commander of the British troops in Ireland. Maj.-Gen. Sir Edward Strickland, divisional commander, and others, in the case of John Egan, sentenced to death by a military court at Limerick in June for having ammunition in his possession.

In a long judgment the master of the rolls has decided that Egan should have been tried by court martial under the Restoration of Order Act. The claim of the military authorities that the existence of the state of insurrection justified them in overriding legislation seemed to him to call for a new bill of rights. There were considerations more important than the temporary duration of an insurrection. Among them were the eternal principles of justice, which could not be violated save with detriment to the interest and feeling of a civilized community.

Toronto Landlords Have New Graft

Charge \$200 For Privilege of Viewing Prospective Homes.

Toronto.—That some landlords are asking prospective tenants the price of \$2 for the privilege of looking at houses and apartments prior to renting them, is the complaint contained in a letter received by a local newspaper. A few days ago a man in the west end of the city asked a real estate agent whether he could take a look at a certain apartment. He was asked \$2 admission fee.

"Will I get my money in case I do not take the place?" he asked.

"No," was the answer.

"But in case I like the looks of the apartment can I deduct \$2 from the first month's rent?" he said next.

"I charge you the \$2 to look at the place," said the agent. "It has nothing to do with the rent."

The indignant correspondent asks, "What will be the next ingenuity of profiteering be?"

Says Father Was Swindler

Daughter of Bank President Admits Knowledge of Alleged Theft.

Chicago.—Vivian Spurgin, daughter of Warren F. Spurgin, missing president of the closed Michigan Avenue Trust Company, who, with her mother, returned to Chicago from Detroit, where they fled following Spurgin's disappearance, has admitted that she had knowledge that her father had taken more than \$500,000 of the bank's money before he fled, it was announced by James E. McShane, assistant state attorney.

Patronize your local merchant and thereby help to build up your home town and community.

Bills are absolutely prohibited in Russia.

Ottawa.—Intending emigrants to Canada from Great Britain are being urged not to sell their homes and other property until they are assured that they can comply with the Canadian immigration regulations. This is the reply of the Department of Immigration to the statements of Canon Pugh, honorary director of emigration, Church Army, London, England. Canon Pugh declares selection of immigrants should be made on the other side of the Atlantic to avoid hardships.

The Canadian Federal authorities are not urging anyone to come to Canada at the present time, officials of the department stated. All advertising for settlers has been discontinued owing to the employment conditions here. There is plenty of Canadian literature available in the steamship and immigration offices in Great Britain but in nearly every case it goes only to people who have already made up their minds to emigrate and are looking for further information as to the country of their choice.

In the descriptive book, "The Canadian West," which the department is distributing in this way to intending settlers who rely on the steamship offices and agencies in search of information, the first page is devoted to giving information as to the regulations governing admission of immigrants to Canada.

"Information on this page," says an explanatory paragraph, "is given prominence in order that persons may not sell out their homes, book their passage and sail for Canada until they are reasonably sure that they can comply with the Canadian immigration regulations and thus be able to enter Canada without delay at Canadian ocean ports."

Intending emigrants are urged to co-operate with the immigration authorities, study the regulations and make sure that they can comply before they make their final arrangements for sailing.

Harvesters From B. C.

First Contingent Will Not Leave Until August 13.

Vancouver.—British Columbia will send every able-bodied man who wants to go to the prairie harvest fields this year. It is expected that a great number will take advantage of the reduced fares.

The provincial employment bureau, however, announces that none will be earlier than August 13, on which date the first contingent will go forward on the regular eastbound trains from Vancouver, and daily thereafter until requirements are filled.

Russians Fire On German Boats.

Berlin.—The German mine sweeping fleet which has been operating in the Kola Bay on the Northern Russian coast, is reported in a special despatch from Vardoe, Norway, to have been fired on by Russian land forces. The German fleet returned the fire but no damage was done on either side.

U.S. Parcel Post System Loss.

Washington.—The parcel post system now is being conducted at an annual loss to the government of approximately \$500,000 a year. Congressman Steenerson, chairman of the house committee on post offices and post rates, states.

A Preliminary Estimate Is Now Supplied Of World's Crop Production

Ottawa.—A cablegram received from the International Institute of Agriculture gives the following preliminary estimates of crop production for 1921, corresponding figures for last year being given in parentheses: Wheat—Spain, 143,140,000 bushels (138,606,000); Hungary, 41,887,000 bushels (20,139,000). The total production of these two countries, and including Belgium, Bulgaria, Finland, Alsace-Lorraine, Greece, Canada (243,720,000), United States, India, Japan, Algeria, Morocco, and Tunis, is 1,712,000,000 bushels. This year's total production is 87.6 per cent. of the two previous years.

Rye—Spain, 27,554,000 bushels (27,831,000); Hungary, 18,938,000 bushels (16,520,000). The total of these two countries, and including Bulgaria, Belgium, Finland, Alsace-Lorraine,

Greece, Canada and the United States, 172,983,000 bushels (164,865,000). Barley—Spain, 92,180,000 bushels (90,463,000). Japan, 89,287,000 bushels (92,140,000). The total production of barley for the same countries as wheat, but excluding Hungary and India, is 552,349,000 bushels (537,738,000).

Oats—Spain, 32,500,000 bushels (35,550,000). The total production, including Bulgaria, Finland, Alsace-Lorraine, Greece, Canada (330,790,700), United States, Algeria and Tunis, is 1,828,000,000 bushels (2,142,000,000).

The grand total for wheat, rye, barley and oats, taken together, is 4,255,000,000 bushels compared with 4,568,000,000 last year, a decrease of 313,000,000.

GIRLS' CAMP

Now that the boys have returned from their camping and had such a good time, it is certain that we ought to try and see if it is not possible to take the girls out for a few days to camp. Probably there are some ladies in the town who would volunteer to take charge of the camp and go out and look after these girls. If anyone is interested and can spare the time to do this, there is not the slightest doubt but what arrangements could be made to take the teen age girls out to camp. It is only fair to give the girls as good a time as we give our boys.

In looking over the list of the farmer members elected to the provincial parliament, we notice there are four members named "Smith". As far as class representation is concerned, the "Smith" class are well represented.

Every day applications for relief are being received at the Red Cross headquarters in Calgary, from the districts where the crops are not good. These are being investigated and met with all dispatch.

Crop Report

General rain has visited most sections of the province during the past few days. A number of districts report from half an inch to three-quarters of an inch. Most of the districts in the southern part of the province have benefited by a plentiful supply. This rain was too late to be of any great assistance to the general crops throughout the southern part of the province. It will however, very materially assist in the filling of the oat and barley crops and later sown wheat.

Practically all sections of the province south of Edmonton have suffered from a shortage of rain during the whole season. Notwithstanding this the big central portion of the province will reap a fair crop. The recent rain has arrived in time to help not only the oats and barley in the central area but will also materially improve the wheat crop except some of the early sown and early maturing varieties.

The whole southern and south-eastern areas will have a light, short crop. In these districts, however, there are certain sections which have been visited by frequent local showers and as a result good crops will be harvested in those areas. This is particularly the case in two or three localities near the southern boundary of the province.

North and east of Edmonton and in the Grande Prairie and Peace River districts the reports are especially good. There has been plenty of rain and the season throughout has been particularly favorable. As far as can be determined at the present time the prospects are that the crop will be heavy all through the north.

One good feature of the situation throughout the south is that the rye crop has withstood the drought well. Rye is now being cut and will make a good general yield.

Wheat and barley cutting has commenced in several parts of the southern and eastern sections of the province. Cutting will not be general, however, for some little time yet though indications are that harvesting will be earlier than usual. This will depend to some considerable extent on the weather conditions during the next two weeks.

Jas. McCaig,
Crop Statistician.

LIFE

Life is very short, be careful
Or the time will glide away,
Ere we pause to realize it,
We will reach the judgment day.

Filled our lives with hatred scolding,
Filled with strife for love of gold,
Filled sometimes with damning pleasure,
And with vice and sin untold. (sure)

Filled with envy of our brother,
Little room have we for God,
Filled with worldly care or pleasure,
We forget where Jesus trod.

Longing for the heavenly mansions,
Working hard for fame or gold,
Thinking when this life is over,
We will easily reach the gold.

Knowing that our God has told us,
"Ye must love with all your hearts,"
Daily sell we our possessions,
Bringing but the smallest part.

Daily saying we are christians,
With our hearts all on this world,
Daily holding onto mammon,
With the flag of God unfurled.

Let us live the life God gave us,
In the Great Redeemer's name,
Let us love the weak and fallen,
Lift them from the depths of shame.

Love thy poor and sinful brother,
Love thy sinner scorned and low,
Love the stairway up to heaven,
Christ our Lord has told us so.

CULTIVATION OF FLAX

The opportunity that exists for the cultivation of flax and the probability of a ready market being found for all that Canada can produce is suggested by the facts that the production of flax in Russia fell from 1,151,933,320 lbs. in 1913 to 90,282,000 lbs. in 1920, a drop of over a billion pounds. In view of this state of affairs increased attention is being given by the scientists in this country to research regarding the growth of flax. A series of plots of new varieties have been sown at Ottawa to be harvested for flax purposes. Arrangements have been made to carry on the retting under suitable conditions so that the quality of the fibre may be fairly representative in order that the different sorts can easily be compared. There are two principal grades of flax fibre, warp and weft which are further divided according to qualities. Warp is

generally broader fibred, stronger and more ribbony flax, and the yarn spun from this is used by weavers for the longitudinal of the cloth. Weft is soft, more pliable flax, not necessarily so strong as warp and is used for the yarn which grows in the shuttle running across the cloth to fill it up. The value of flax fibre is primarily dependent upon its strength. The color should be uniform, but spinners do not attach so much importance to color as they used to do provided that the substance has the required strength and quality. Silkeness and oiliness are essential to a high standard. The removal of all slime and dirt from the flax, especially at the root ends, is another necessity.

History Of Navigation Of Hudson Bay Waters For Over Two Centuries

For two hundred and twenty-two years, sailing ships bore cargoes to the Bay, but in 1892 the first steam-propelled vessel took in the York Factory supplies. This was the "Erik" formerly a noted whaler in the Greenland seas. This vessel and her sister ships the "Hope" and the "Windward" were owned by the Greys of Peterhead, Scotland, a name that was a household word in the whaling industry for generations.

Captain Alex Grey, one of the three brothers, was in command of the "Erik" on this first voyage for the H.B.C. The "Erik" was a fine ship and, like all vessels in the Polar trade, massive in her construction. Though steam propelled, she carried sails, and was square rigged.

The sailing ships continued operating to James Bay until 1906 when the "Discovery," Captain Scott's ship of Antarctic fame, came into the possession of the company, and sailed for Charlton Island, James Bay, under Captain Grey.

From 1751, when the "Sea Horse" (Captain John Fowler) cast anchor in the Moose roads up to 1905, when the "Stork" commanded by Captain Norman Frenkel, arrived at Charlton Island, Moose Factory had its annual sailing ship. Such a record must be unique in the annals of shipping and surely bears testimony to the character and quality of the officers and crews. They were no fair-weather sailors.

It is worthy of note, too, that during the long and protracted wars of the latter part of the 18th and early 19th centuries, when privateering was considered the sport of the day, the H.B.C. ships arrived with unflinching regularity at the Bay ports. No doubt this was due to the activity and vigilance of Nelson's frigates.

When the battle of Trafalgar was fought on October 21st, 1805, the "Prince of Wales" (Captain Hanwell) was nearing England, or perhaps had just arrived for she had sailed from Moose Factory on September 14th of that year.

In 1815, the year of the battle of Waterloo, two H.B. ships, the "Eddystone" (Captain John Turner) and the "Hallow" (Captain John Davidson) were sent out to Moose Factory. Both ships wintered at Straiton Island in James Bay, arriving October 20th, presumably having run back from the straits on account of ice. In 1901, the H.B. "Pelican" came on the scene, replacing the "Erik" on the Labrador, York Factory and Churchill route.

The company's establishments on the Labrador coast date back to the early years of the last century. In 1860 when Donald A. Smith (Lord Strathcona) was supervising that part of the country, a steam auxiliary was constructed in England for work on the coast as well as in Ungava. This ship was in commission for about 30 years when she was sold. But four years ago she was wrecked off the coast of Newfoundland.

She was noted chiefly for her strength of construction, being close-planked and with double planking of oak and greenheart. In her bows there were eight feet of solid oak. As an ice puncher she was of the finest. Sandy Grey, her master, "whacked" against every obstacle that came his way—barring bergs. I mention this ship more particularly on account of its associations with Lord Strathcona. He made many trips from England to the Labrador coast on her. Even this ship must have been too slow for his active mind and temperament, for he was only happy when every stitch of canvas was crowded on. She carried studding sails, and when Lord Strathcona was a passenger—as the stories go—there was no aid lost no matter how gentle a zephyr might have been blowing—Extract from article by H. M. S. Catter in "The Beaver."

"Limericks" Origin.
A correspondent has inquired the origin of the name "limerick" as applied to a nonsense verse of five anapaestic lines. According to the Standard Dictionary, "limericks were usually extemporaneous compositions produced at convivial parties in England by each individual in turn, while the entire party joined in singing a chorus in which were the words 'Will you come up to Limerick?'; from this it is supposed the name is derived."—New York Times.

General U. S. Grant was of Scotch ancestry, but all his family were American in all his branches for eight generations.

Metal screws have been made since 236 B.C.

Torpedo Menaces

French Village

German Infernal Machine Still Embellished Deeply In Soil

An infernal machine menaces the village of Villahav, France. A message from Mons states that as it has been impossible up to the present to release the torpedo of 100 kilos which the Germans launched at the Villahav, and which, without exploding, became embedded in the soil to a depth of fifteen metres, it is intended to make another attempt this time with an electrical apparatus, which will allow the workers to carry out the operation at a distance. If this does not succeed the torpedo is to be encased in a thick layer of concrete in order to safeguard against the possibility of a catastrophe, as if the torpedo exploded, it would destroy the whole village.

Playing the Game

British Can Be Depended On For Fairness

"I like the game," says Admiral Sims, "because you can be sure they will play the game."

Let us cite a little cricket incident. In the recent match, Australia v. England, the visitors appealed for a catch-out at the wicket, the question being whether the ball had touched the bat in passing. The umpire decided "not out." Evans, the batsman, played the next ball on his wicket. "A suspicious stroke," the newspapers said.

The inference is that he knew he had been out on the previous ball, and preferred not to go on—not to benefit from an erroneous decision by the umpire. There is something in a game like that, and in men who can play it that way.—From the Toronto Star.

Prospects Remote For Share of War Indemnity

Will Amount to Only About One-Sixth Of Our War Debt

From the first, Canadians have not expected much from German indemnities. Our share in the Allies' campaign was important and the cost to us lamentably heavy, but what this country did and suffered was a small part of the appalling total. Among so many claimants, the German indemnity could not begin to extinguish the full war expenditures of each one. The British Empire obtained only 22 per cent in the allocation. France about 55 per cent, and Belgium, Italy and lesser Allies, the balance.

The fixing of Canada's share of the Empire's allotment at \$399,000,000 was based on our casualties, expenditures and loss of shipping, says the Toronto Mail and Empire. It represents about 4.5 per cent of the Empire's total. "The amount may seem small in comparison, but our losses were small, alongside those of the Motherland. Elaborate statistics show that England truly had the lion's share of the Empire's burden, in a military as well as a shipping way, and her part of the Empire is disposed to challenge them in any case, payment of German indemnities to the British Empire is a remote business. French and Belgian claims for reconstruction of devastated areas have to take precedence, and France also has dire need of payments from Germany to help meet general war obligations. The \$300,000,000 is a gambler's prospect, since Germany's ability to pay the full thirty billions is very debatable. Expert opinion on it differs widely.

Even if the \$300,000,000 were paid in a few years, it would amount to about one-sixth of our war debt. The amount is not large enough to cause any alteration whatever in Canada's fiscal outlook. The Canadian people have to finance their debt in full and they have much reason to be thankful that it is the smallest, per capita, among the leading units of the Empire.

The Same Thing.

The drummer looked across the aisle. The seat beside the pretty girl was vacant. Going over, he said, "Is this seat engaged?" "No," said the girl, "but I am; so it won't do you any good."

Of a thousand persons, only one reaches the age of one hundred years, while only one couple in eleven thousand live only to celebrate their diamond wedding.

Spend your money at home, thereby helping your own town and local merchants.

Markets Demand Hornless Cattle

Export Shippers Say the Practise is Imperative

"The practise of dehorning cattle is almost universal so far as high-grade beef steers are concerned. The majority of feeders and practically all the well-finished steers that appear on the market today have been dehorned."

This statement was officially made even before the war by the United States Department of Agriculture. Why should the same practise not be adopted as widely by Canadian farmers? Commission men and export shippers in both eastern and western provinces say the practise is imperative. They point to results in the States today where, between horned and dehorned, there is often a considerable premium paid for the dehorned.

Many hundreds of thousands of dollars a year are undoubtedly lost in Canada through bruising caused by horns. The damage done to the flesh of otherwise carefully prepared meat animals often surprises those who see the carcasses hung on the rails in the packing plants.

Yet the positive advantages of dehorning to the producing farmer himself are so plain that it seems strange that the first move has had to be taken by the in the marketing end of the livestock industry.—Industrial and Development Council of Canadian Meat Packers.

Good Neighbors

Growth of Friendly Feeling Between Canada and U.S.

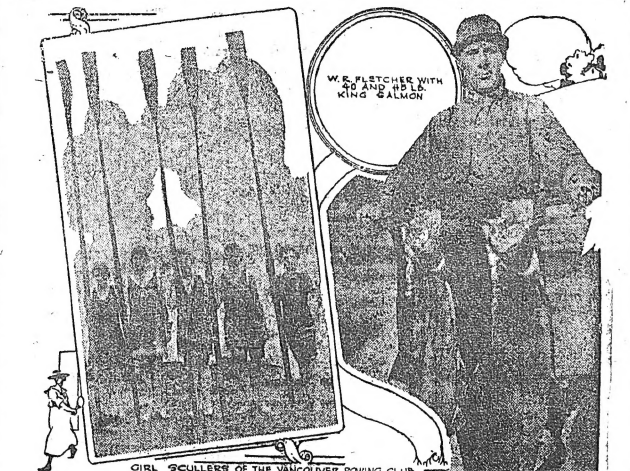

It is thought likely that by the end of the year Washington will have a minister from Canada numbered among the other envoys. The United States, in turn, will send a minister to Ottawa.

There were never two countries living side by side in such perfect peace, says the Buffalo Express. No armed forces need patrol the border between them. There is not a bad-temper among the great lakes. For more than 100 years there has not been a flicker of trouble. In normal times, the trade between the United States and Canada is enormous, and even with the present rate of exchange, which is most unfavorable to our neighbors, there continues to be much commercial activity. There should be more direct relationship between the two lands, and it is to be hoped that before the new-year it will have been accomplished.

Be fair to your local merchants. Ask to see his goods and compare prices before sending your money to the mail order houses. You will find that it pays.

In the White Sea ice forms after August, 30 miles out, and does not melt until July.

Sport A-Plenty on Vancouver Island all the Time

When Captain Vancouver discovered Vancouver Island 128 years ago, he declared that it required only to be nourished by the industry of man, with villages, mansions and cottages to be "the most lovely country that can be imagined." Man has ably supplemented Nature since then, and the traveler who has crossed the United States to California returns east through Canada to enjoy the beauties of Victoria and Vancouver and the Canadian Pacific Rockies.

Owing to the mild climate in winter, Vancouver island is as great a playground for lovers of sports as it is in summer. There are splendid roads and famous drives for the motorist, water sports of all kinds are

Prince is a Busy Man

Prince of Wales Leads a Busy Life Even in England.

"A man's house—the home of a man's man"—is the description of York House, the Prince of Wales' official residence, in a new biography of the Prince, by Miss G. Ivey Sanders, which was published on the Prince's 27th birthday.

The rooms which the Prince occupies are the same as those in which his father and mother, as Duke and Duchess of York, lived for some time during his childhood.

The two beautiful, but quietly furnished, reception rooms adjoining the simple dining room, on the ground floor are now devoted almost entirely to his secretariat. The plain square entrance hall contains some interesting trophies of his active service, including the bass drum and two side-drums of his regiment and two bugles used by the Grenadier Guards in France.

Some fine old English tapestries relieve the bareness of the wide, white paneled staircase.

The Prince's own apartments overlooking Cleveland Row, are extremely modest and business-like and consist of two lofty formal reception rooms and his own small sitting room. The latter is comfortably, but simply, furnished in old mahogany, of Chippendale design. A restful green is the dominating color of the carpet, upholstery and curtains. A massive desk, usually covered with papers, proclaims it to be the workroom of a very busy man.

It is characteristic of the Prince that he sleeps in the little dressing room off his spacious bedroom.

Like his grandfather, King Edward, the Prince is said to be a moderate reader. He dislikes cards and billiards, and is a great smoker, with a pronounced preference for a pipe. Above all, he is a young athlete, a real sportsman, and regulates his life, as far as possible, as one always in training.

His time when in London is fully occupied.

When World Will End.

Professor Finders Peirce, the eminent Egyptologist, prophesies that the end of the world will come about 200,000 years hence, by reason of the disappearance from the atmosphere of the last traces of carbonic acid gas, which provides the whole of the vegetable world with carbon, its essential food.

When a Siberian bride enters her husband's house for the first time she must be prepared to show her skill in cooking. She is expected to give a dinner prepared with her own hands as a test of her education in the culinary art.

The Shah of Persia possesses an armchair made of solid gold, inlaid with precious stones.

Ever Present Problem Of Dealing With Farm Help In The Western Provinces

The problem of farm help, which year after year in connection with the cultivation and harvesting of Western Canada's increasing crops is a matter of such vital importance to the farmers, that it formed the basis of an interesting discussion at the Second Annual Conference of Western representatives of the Employment Service of Canada, held this spring at Regina. It was attended by representatives of the four western provinces, Director Bryce Stewart, Ottawa, and delegates from the United Farmers of Alberta, Saskatchewan and Manitoba.

Agriculture is a highly seasonal industry divided into two work periods of April and May, and the "second period" August, September and part of October. These two seasons are by no means well divided and the dates of commencing or closing of each season vary considerably.

The demand for men in either season, and especially in the harvest season, fluctuates widely, giving to the harvest labor operations a distinctly spotted character.

Weather conditions are probably the greatest factor in causing fluctuations in the demand for men. Hot, dry weather, causing grain to ripen quickly, will create a frantic demand for a large number of men, whereas a spell of cool, wet weather will result in hundreds of farmers refusing to accept men directed to their farms.

Varying degrees of weather over comparatively small areas will cause harvest in the various areas which should be done in succession, being all done at the same time. Harvest operations under even normal conditions never commence on the same date two years in succession. All fields, even in the same area, are not sown on the same date in the spring, thereby causing a difference in the date of ripening.

Rust, grasshoppers, hail, drought and rain are ever-present causes of fluctuations in the demand for harvest help, and many transient harvest laborers secure a surprisingly large number of jobs during the short seasons.

Added to the above uncontrollable causes of fluctuation must be considered the desire of farmers to complete harvest operations as early as possible. The fact that practically all the farmer's earnings are standing in his fields, the desire to complete the summer work as early as possible, and the fear of unfavorable fall weather, all tend to create a big demand for a few weeks, which demand then tapers off. Harvest laborers too frequently wait in the cities for the larger

wages paid during the peak load and then rush back east for inside jobs before the coming winter.

That the farmers and the unemployed both appreciate and realize the co-operation of the Employment Service was brought out at the Convention by the farmer delegates who, to further this co-operation, presented recommendations dealing with the following points:

The abolition of private labor bureaux; standardization of wages in different provinces; one standard of wages for five months commencing April 1st, and for eight months commencing April 1st; one standard for three months commencing September 1st.

A periodical survey to estimate labor requirements for any period; farmers' associations should be used for this purpose. Labor bureaux should make every effort to adjust labor supply to meet the requirements of seasonal employment within the province, by making convenient the transfer of labor from agriculture to winter industries and vice-versa.

In adopting a standard of wages, due consideration should be given to the experience of the applicant. It was suggested that \$40 to \$50 would be fair for the first five months and \$50 to \$60 for the eight months season. Rate of harvesting season to be adjusted at such time.

After discussion, it was agreed that farmers' organizations urge their membership to a more general use of the Employment Service, where offices are established, pointing out the evils of picking up help indiscriminately, or seeking to secure it from other sources at varying wages; and agreed that the Employment Service in co-operation with the various farmers' organizations put on a campaign urging farmers to engage help early as an insurance against loss through labor shortage.

To Reclaim Swampy Land

Muskeg Areas In Northern Alberta Will Be Investigated By Federal Department.

With a view to finding the agricultural possibilities of the swampy land in certain parts of Alberta, north of Edmonton, a survey will be made this summer by a party of federal department of agricultural experts. The question of developing these areas of muskeg will be fully investigated and following their report it is expected that experimental work will be carried on in a large scale, with a resultant benefit in Northern Alberta.

If the experiments carried out prove to be as favorable as anticipated, several rich areas will be opened to agriculturists, and the result will undoubtedly prove of great value to the agricultural industry of Alberta as a whole and to the farmers of Northern Alberta in particular.

Pots and saucers are now made semi-circular, with one flat side, so that two of them appear as one when placed together. By this device two dishes may be cooked at once with the gas required for one.

As a trade inducement some of the large restaurants in London offer to supply free of cost the recipe and cooking instructions for any item on the menu that particularly pleases the palates of their customers.

A Roman military standard and a Roman general's camp chair, supposed to have been lost after the defeat of the Ninth Legion by Hadrian, have just been sold at auction in London.

Denmark is the only country which restricts its sovereigns to two names, used alternately. For over 400 years the Danes have had only Christians and Fredericks as their monarchs.

York Cottage, King George's home in Norfolk, was built by the late King Edward for the members of his staff, and was then known as Bachelors' Cottage.

That ninety per cent of runaway husbands have blue eyes is the declaration with which an English judge has started a spirited public controversy.

Three-quarters of the entire Jewish population of the United States are concentrated in ten cities which hold about 14 per cent. of the total general population of the United States.

The Rocky Mountains of Central America form an absolute barrier to the trade winds which blow over the Gulf of Mexico.

Oh, Money! Money!

ELEANOR H. PORTER

Printed by Special Arrangements with The Allen, Toronto, Ont.

(Continued)

Five minutes later, once more on the street, he was walking home with Benny. It was Benny who broke the long silence that had immediately fallen between them.

"Say, Mr. Smith, I'll bet you'll never be rich!"

Mr. Smith turned with a visible start.

"Eh? Who mean, boy? I'll never be—What do you mean, boy?" Benny giggled cheerfully.

"Cause you paid Aunt Jane what she asked the very first time. Why Aunt Jane never expects to get what she asks, pa says. She sells him groceries in the store sometimes, when Uncle Frank's away, ye know. Pa says what she asks first is for practice—just to get her hand in; and she expects to get the rest, and you paid it right off the bat. Didn't ye see how tickled Aunt Jane was, after she'd got over her surprise?"

"Why—er—really, Benny, murmured Mr. Smith.

But Benny had yet more to say.

"Oh, yes, sir, you could have saved a lot every week, if ye hadn't let so quick. And that's why I say you won't ever get rich. Savin' a what does it, ye know—ye folks rich. Aunt Jane says so. She says a penny saved's good as two earned, an' better than four spent."

"Well, really, indeed, Mr. Smith laughed lightly. "That does look as if there wasn't much chance for me, doesn't it?"

"Yes, sir," Benny spoke soberly, and with evident sympathy. He spoke again, after a moment, but Mr. Smith did not seem to hear at once.

Mr. Smith was indeed, not a little abstracted all the way to Benny's home, though his good-night was very cheerful at parting.

Benny would have been surprised, indeed, had he known that Mr. Smith was thinking, not about his foolishly extravagant agreement for board, but about a pair of starry eyes with wistful lights in them, and a blue dress, plainly made.

In the hotel next morning, Mr. Smith wrote the following letter to Edward D. Norton, Esq., Chicago:

My Dear Ned—Well, I'm here. I've been here exactly six hours, and already I'm in possession of not a little Blaisdell data for my—er—book. I've seen Mr. and Mrs. James, their daughter, Bessie, and their son, Benny.

Benny, by the way, is a gushing geyser of current Blaisdell data which, I foresee, I shall find very interesting, but embarrassing, at times. I've also seen Miss Flora, and Mr. and Mrs. Blaisdell and her daughter, Millicent.

There's a "Poor Maggie" whom I haven't seen. But she isn't a Blaisdell. She's a Duffy, daughter of the man who married Ruth Blaisdell's widow, some thirty years or more ago. As I said, I haven't seen her yet, but she, according to Mrs. Frank Blaisdell, must be a genuine over-seer of Blaisdell data, so I probably soon shall see her. Why she's "poor" I don't know.

As for the Blaisdell data already in my possession—I've no comment to make. Really, Ned, to tell the truth, I'm not sure I'm going to relish this job, after all. In spite of a perfectly clear conscience, and the virtuous realization that I'm here to bring nothing worse than a hundred thousand dollars apiece (with the possible addition of a few millions on their devoted heads—in spite of all this. I yet have an uncomfortable feeling that I'm a small boy listening at the keyhole.

However, I'm committed to the thing now, so I'll stick it out, I suppose—though I'm not sure, after all, that I wouldn't chuck the whole thing if it wasn't that I wanted to see how Millicent will enjoy her pink dresses. How many pink dresses will a hundred thousand dollars buy, I wonder?—I mean pretty pink dresses, all fixed up with frills and furbelows?

As ever yours,
Stan—John Smith.

CHAPTER IV. In Search of Some Dates.

Very promptly the next morning Mr. John Smith and his two trunks appeared at the door of his new boarding place. Mrs. Anne Blaisdell welcomed him cordially. She wore a high-necked, long-sleeved gingham apron this time, which she neither removed nor apologized for—unless her cheerful "You see, mornings, you'll find me in working trim, Mr. Smith," might be taken as an apology.

Millicent, her slender figure, was self-enveloped in a similar apron, was dusting his room as he entered it. She nodded absently, with a casual "Good-morning, Mr. Smith," as she continued at her work. Even the placing of the two big trunks, which the shuffling men brought in, won from her only a listless glance or two.

Then, without speaking again, she left the room, as her mother entered it.

"There?" Mrs. Blaisdell looked about her complacently. "With this couch-bed with its red cover and

Use **MURINE** Night and Morning Cream. Keep Your Eyes Clean—Clear—Healthy. Write for Free Eye Book. Murine Co., Chicago, U.S.A.

W. N. U. 1379

cushions, and all the dressing things moved to the little room in there, it looks like a real sitting-room in here, doesn't it?"

"It certainly does, Mrs. Blaisdell." "And you had 'em take the trunks in there, too. That's good," she nodded, crossing to the door of the small dressing-room beyond. "I thought you would. Well, I hope you'll be real happy with us, Mr. Smith, and I guess you will, with all the nice things with mats and tiles and spreads."

"Yes, I see." A keen listener would have noticed an odd something in Mr. Smith's voice; but Mrs. Blaisdell apparently noticed nothing.

"Yes, I always do—to save wearing and soiling, you know. Of course, if we had money to buy new all the time, it would be different. But we haven't. And that's what I tell myself when she complains of so many things to dust and brush. Now make yourself right at home, Mr. Smith. Dinner's at twelve o'clock, and supper is at six—except in the winter. We have it earlier then, so's we can go to bed earlier. Saves gas, you know. But it's at six now. I do like the long days, don't you?"

Well, I'll be off now, and let you unpack. I'll be right at home, perfectly at home."

Left alone, Mr. Smith drew a long breath and looked about him. It was a pleasant room, in spite of its cluttered-fashioned desk for his papers, and a chair, and a small table, and a comfortable. The little dressing-room carried many conveniences, and the windows of both rooms looked out upon the street.

"Oh, well, I don't know. This might be lots worse—in the spite of the tidies," chuckled Mr. John Smith, as he strolled out of the keys of his trunks. At the room dinner table Mr. Smith met Mr. Frank Blaisdell. He was a poorly man with rather thick gray hair and "mutton-chop" gray whiskers. He ate very fast, and a great deal, yet he still found time to talk interestingly with his new neighbor.

He was plainly a man of decided opinions—opinions which he did not hesitate to express, and which he emphasized with resounding thumps of his fists on the table. The first time he did this, Mr. Smith, taken utterly by surprise, was guilty of a visible start. After that he learned to accept them with the serenity evinced by the rest of the family.

When the dinner was over, Mr. Smith knew (if he could remember them) the current market prices of beans, corn, potatoes, sugar and flour; and he knew (again if he could remember) what the prices of these commodities were higher and some lower, than they had been the week before.

In a way, Mr. John Smith was interested. That stock and bonds fluctuated, he was well aware. That wheat could be cornered, he realized. But the whole idea of degrees of corn and beans as seen by the retail grocer he knew very little. That is, he had known very little until after that dinner with Mr. Frank Blaisdell.

It was that afternoon that Mr. Smith began systematically to gather material for his Blaisdell book. He would first visit by turns all the Miller, Blaisdell, he decided; then, when he had exhausted their resources, he would, of course, turn to the town records and cemeteries of Hillcroft and the neighboring villages.

Armed with a pencil and a very businesslike looking notebook, therefore, he started at two o'clock for the home of James Blaisdell. Remembering Mr. Blaisdell's kind permission to corner and ask the questions he liked, he seemed it fitting to begin there.

He had no trouble in finding the house, but he had no one in sight at this time, as he ascended the steps. The house, indeed, seemed strangely quiet. He was just about to ring the bell when around the corner of the veranda came a hurried step and a warning voice.

"Oh, please don't ring the bell! What is it? Isn't it something that I can do for you?"

Mr. Smith turned sharply. He thought at first, from the first slender figure, and the waving hair above the gracefully poised head, that he was confronting a young woman. Then he saw the silver threads at the temples, and the fine lines about the eyes.

"I am looking for Mrs. Blaisdell—Mrs. James Blaisdell," he answered, lifting his hat.

"Oh, you're Mr. Smith, aren't you?" Mr. Smith smiled brightly, then went on before he could reply. "You see, Benny told me. He described you perfectly."

The man's eyebrows went up. "Oh, did he? The young rascal! I fancy I should be edified to hear it—that description."

The other laughed. Then, a bit roughly, she demanded— "Should you like to hear it—really?"

"I certainly should. I've already collected a few samples of Benny's descriptive powers."

"Then you shall have this one. Sit down, Mr. Smith." She motioned him to a chair, and dropped easily into one herself. "Benny said you were tall and not fat; that you had a wreath of light hair round a bald spot, and whiskers that were clipped as even as Mr. Penstock's hedge; and that your lips, without speaking, said, 'Run away, little boy, but that your eyes said, 'Come here.' Now! I think Benny did pretty well."

"So I judge, since you recognized me without any difficulty," rejoined Mr. Smith, a bit dryly. "But—you see you have the advantage of me." Benny hasn't described you to me." He hesitated significantly.

"Oh, I'm just here to help out. Mrs. Blaisdell is ill upstairs—one of her headaches. That is why I asked you not to ring. She gets so nervous when the bell rings. She thinks it's callers, and that she won't be ready to receive them, and she hurries up and begins to dress. So I asked you not to ring."

"But she isn't seriously ill?"

"Oh, no just a headache." She has

To Remove Bad Cold Medicine Not Necessary

The Balsamic Vapor of "Catarrhazone" When Inhaled Quickly Disperses Colds

Every breath you draw through a Catarrhazone Inhaler fills the whole breathing apparatus with pure pine essences that stops colds at their very beginning. You experience a pleasant sensation of relief at once. Soreness, congestion and irritation leave the nose and throat—the head is cleared, and every trace of cold and Catarrh disappears. Catarrhazone is so sure, so pleasant, such a safe remedy for winter ills that you can't afford to be without it. It lasts for a long out, it is without stain, small size, 50c; trial size, 25c at all dealers for the Catarrhazone Co., Montreal.

them often. You wanted to see her?"

"Yes, But it's not important at all. Another time, just as well. Some questions about it all."

"Oh, for the book, of course. Oh, yes, I have heard about that, too." She smiled again brightly. "Can't you wait? Mr. Blaisdell will soon be here. He's coming early so I can go home. I have to go home."

"Miss Duffy. My name is Duffy." "You don't mean—'Poor Maggie'?" (Not until the words were out did Mr. Smith realize quite how they would sound.) "Er—ah—that is, I stumbled miserably, and she came to his rescue."

"Oh, yes, I'm—'Poor Maggie'." There was an odd something in her expressive face that Mr. Smith could not fathom. "He was groping for something—anything to say, when suddenly there was a sound behind him, and the little woman at his side sprang to her feet."

"Oh, Hattie, you came down!" she exclaimed as Mrs. James Blaisdell opened the screen door and stepped out to the veranda. "Here's Mrs. Blaisdell now, Mr. Smith."

(To be continued)

People Living In Stone Age Manner

Life is Monotonous for Inhabitants of Rennell Island.

People who are still living in the manner of the Stone Age are found on Rennell Island, in the Solomon Group, Melanesia, according to Dr. Northcote Deck, a missionary.

Dr. Deck says there are only about 500 inhabitants, and because of their isolation, through lack of ship's anchorage, even their dialect has never been studied.

The natives only had implements and weapons of stone and wood when Dr. Deck first visited the island. They showed great eagerness to barter home-made articles for anything made of iron.

The men are great fighters and warriors. Their throwing spears have points made of human leg and arm bones, and tipped with a bone splinter designed to break off in the wound," says Dr. Deck.

"They seemed to feel keenly the monotony of their isolation and showed a settled melancholy, both in their faces and the cadence of their voices. Their only sort of music, to which they dance, consists in the unrelentless beating of a log."

The teeth of flying foxes, which swarm in the caves on the island, seem to be the only form of currency known there.

British Columbia Protects Beavers

Order-in-Council Makes Industry a Government Monopoly

The discovery that a highly-organized smuggling "ring" is in existence, dealing in beaver skins caught in British Columbia, has led to a drastic order-in-council at Victoria, whereby the beaver industry is practically made a Government monopoly, and any person found illegally in possession of beaver skins will be liable to six months' imprisonment without the option of a fine. Dr. D. R. Baker, head of the Game Conservation Board, declared at a meeting of that body that the board had conclusive proof of heavier "bootlegging," it being shown that no less than from 4,000 to 6,000 beaver skins had unlawfully left British Columbia for Alberta. These beavers had been illegally killed, illegally bought and illegally shipped out of British Columbia. It is stated that the Government will purchase and market the 5,000 skins valued at \$100,000, now held in various racks by Indian trappers.

A Unique Flag.

A United States flag has been made in Jamestown, N.Y., which is unique in that it was made of wood, sorted by a Yankee, scoured by an Albanian, carded by an Italian, spun by a Swede, warped by a German, dressed by an Englishman, drawn by a Scotchman, written by a Belgian, supervised by a Frenchman, inspected by a Yankee, dyed by a Turk, examined by an Irishman and dressed finally by a Pole.

Every dollar spent in your home town is a boost for the community.

A Wireless Pioneer

Professor Fleming Invented Key to Wireless Telegraphy.

The Royal Society of Arts has awarded the Albert Medal of the society for 1921 to Professor John Ambrose Fleming, M.A., D.Sc., who is seventy-three, in recognition of his many valuable contributions to electrical science.

Professor Fleming is the inventor of the thermionic valve, which was the key to all modern wireless telegraphy and which it made possible. The valve can be made to produce wireless waves, to detect wireless waves, and to magnify them when detected.

Taxes at Doorn

Ex-Kaiser Must Pay For Living In Holland.

There is something pathetic in the All Highest fallen or being forced into the role of tax dodger in the little town in Holland where he has taken refuge. The authorities at Doorn assessed their distinguished visitor along with the other residents, and we suppose they did not show any leniency in fixing the amount.

The ex-Kaiser protested. Thereupon the callous burghers have replied in effect that if Wilhelm doesn't like the way the town is run he may go back where he came from. That is up to him in a rather nasty way. To go back where he came from would just be inadvisable. Besides, the home folks are paying largely high taxes too, and many of them have an ungrateful idea that if Wilhelm hadn't gone off on the loose they wouldn't have to be levied on from head to heel and compelled to spend most of their time working for tax collectors.

An Old Locomotive

After Years of Inactivity 90-Year-Old Engine Stands, Test.

The De Witt Clinton, the first locomotive operated in New York state, is resting after celebrating its nineteenth birthday by drawing a train of quaint cars of the type in vogue in 1831. The test was given preparatory to a run to New York City.

The engine chuffed and puffed under the pressure of 75 pounds of steam as it exceeded the old-time speed limit of eight miles an hour. Although it shook and groaned after years of inactivity, officials of the New York Central said it stood the test well. Several short runs were made.

The engine and train have been on exhibition at the Grand Central station in New York for some years.

To Help Famine Victims.

In an effort to save money to be sent for the relief of the famine victims in China, over 150 Chinese students at the University of Chicago and Northwestern University have agreed to limit the cost of their food to 65 cents a day for the next three months. In addition, the men will abstain from tobacco and the women from candy and motion picture shows.

Russia's Marriage Customs.

Russia still has many odd and curious marriage customs. One is for the bride and bridegroom to race rapidly down the aisle as soon as the bride procession enters the church, because of the belief that whichever places a foot on the cloth in front of the altar will be master in the household.

When Your Appetite Fails This Is What You Need

When the very thought of eating makes you feel dizzy, when you're run down, stomach in bad shape—you need a real house cleaning with Dr. Hamilton's Pills. They tone up the liver, assist the stomach and improve digestion. The taste becomes aware of new flavors in food you never noticed before. You'll look and feel a whole lot better after using Dr. Hamilton's Pills. Many folks used this fine old remedy and nothing else and kept in the pink of condition all the time, 25c at all dealers, or The Catarrhazone Co., Montreal.

The First Postcard

Was Introduced In Austria Over Fifty Years Ago.

Postcards were introduced in the first place in Austria in 1869. A year later they were used in England. For half a century the postcard has been a popular institution, and its popularity has consistently increased. In 1872, two years after their introduction into England, no fewer than 76 million postcards passed through the post. Ten years later, in 1882, the figure had increased to 135 millions. Almost double that quantity were posted in 1892. By 1902 the figure had reached 491 millions, while in 1906 the 800 million mark was reached. When the letter rate was raised some time ago the postcard scored again, but now that the postcard rate is to be increased there will be little left of that particular economy.

Fresh Milk in Cubes

Milk In Solid Form Readily Dissolved In Tea.

In Holland milk is now put up and sold in solid form, being made into little cubes which are readily dissolved in tea, coffee or other fluids.

The milk, after removal of the cream, is reduced by heat to dryness, then powdered and mixed with the cream, the material being pressed into blocks.

These milk cubes have the advantage of preserving their freshness for a long time. They are recommended for use in regions where milk is not easily to be had, and travelers may find it convenient to carry a supply of them.—Philadelphia Public Ledger.

Vanished Power

The great Krupp gunworks has become a cemetery. The allied commission has destroyed the machinery for making engines of destruction and has done away with all partially completed weapons. The immense works have been wrecked with dynamite. Their passing is a significant symbol of the vanished power of Germany, boastfully founded as it was of "blood and iron."—Rochester Herald.

Sir John Herschel, who knew a great deal about comets, estimated that even those with tails millions of miles in length do not weigh more than a pound.

World Happenings Briefly Told

Quebec province will have a surplus of over \$1,200,000 for the fiscal year ending July 30 last.

The Helen mine in the Michigan district has been wiped out by forest fire raging in that section.

The Japanese cabinet has decided to accept participation in the proposed conference on Far Eastern problems, the Associated Press is informed.

The Saskatchewan Department of Agriculture has purchased a number of cattle from Ontario, through A. J. Clarke, purchaser for the livestock branch.

Power of the Dominion Government to enforce conscription without first consulting the people, was objected to by the Hull Trades and Labor Council.

Two animals of the renowned Arvald herd of Holstein Frisians, owned by A. C. Hardy, Brockville, have been purchased by the Japanese Government for its experimental farm system.

The first meeting since the war between Japanese and German scientists took place in Berlin when six eminent Japanese physicians attended a session of the Berlin Academy of Medicine.

From Halifax to Vancouver in a 15-foot boat is the objective of Capt. J. T. Day, Harry Inglis and H. J. Morrison, who have left on the long trip. They will follow the coast line and go through the Panama Canal, their only motive power a small sail, jib and oars.

The French National Union of Combatants has approved a proposal providing for cards for veterans of the Allied nations entitling the former soldiers to all the advantages in an Allied country that they enjoy in their own. The organization has a membership of 800,000.

Germany lost 1,792,368 men killed and 4,246,874 wounded from 1914 to 1918, according to a revised compilation of the German casualties during the war. In addition, 200,000 men are still reported missing. The losses in the navy, which are included in the casualties given above, were 34,257 men killed and 31,083 wounded.

THIS WOMAN'S MISERY

Ended by Lydia E. Pinkham's Vegetable Compound. Remarkable Recovery of Mrs. Church.

Smiths Falls, Ont.—"I suffered with falling of my organs, pains around my heart and in bowels and down my legs, neuralgia in my face and head, and that terrible sinking feeling. I felt that I could not live and would fix my house in order every night so there would be no trouble if I dropped off in the night. My husband went to the drugstore to get the best remedy he had, and he gave me Lydia E. Pinkham's Vegetable Compound. I took six bottles and felt a lot better. I will always recommend the Vegetable Compound, and you can use these facts as a testimonial."—Mrs. J. O. Church, Box 845, Smiths Falls, Ont.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

If there are any complications about which you need advice write in confidence to Lydia E. Pinkham Medicine Co., Lynn, Mass.

Wheat Sixty-Six Pounds to the Bushel

Exhibitors at Edmonton Fair Had Some Good Grain

Among the exhibitors of grain at the Edmonton fair, was Mr. Price Sheppard whose entry of wheat weighed 66 pounds to the bushel. J. Strassburger, of Stony Plain, was also a prominent exhibitor in grains and vegetables. Of special interest was the exhibit of Alla Swedish red clover above which was an inscription stating that this clover which was first sown in 1915 had stood the test of six years without a single failure. This information should be of great value to the farmers as it is generally believed that red clover will not winter in Alberta, consequently, farmers do not sow this clover which is valuable not only for feed and seed, but as fertilizer. Wm. Chalmers, of Edmonton shov, was the exhibitor, and he is enthusiastic in his praise of its qualities, and adaptability to the country.

Is Your Stomach Sour? Do You Belch Gas?

If you have sour risings from the stomach, feel bloated and uncomfortable, just try twenty drops of Nervine in sweetened water. Relief will come quick. Nervine dispels the gas, sweetens the stomach, makes you fit and fine in a few minutes. As a general household remedy for many of the ills that constantly turn up, nothing is more useful in every home than a 3-cent bottle of good old "Nervine."

Your Summer Vacation

Special Summer Tourist Fares To The Pacific Coast.

Special Summer Tourist tickets to Vancouver, Victoria, Seattle and other Pacific Coast points are now on sale daily by the Canadian Pacific Railway. These tickets will bear a final return limit until October 31st, and permit stopovers en route, which gives travelers an opportunity of visiting some of the beautiful resorts in the Rockies, such as Banff, Lake Louise, and Glacier, where the Company maintains splendid resort hotels. These tickets are optional via the main line or Rocky Mountain route in one or both directions without extra charge. No expensive side trips necessary.

In addition to the "Trans-Canada Limited" exclusive sleeping car train, a choice of two other daily trains is offered, and as all are equipped with open-top observation cars through which you can obtain an excellent view of the magnificent scenery may be had. Any Agent of the Canadian Pacific will be pleased to give further particulars and make the necessary arrangements for the trip.

Is Your Riddle Here?

When is a postage stamp like a clock? When is it sticking (ticking). Why is a music master the fastest man in the world? Because he beats time.

Which is the warmest day in winter? Sunday (Sun-day).

Spell water in three letters. I-e-e. What is book-keeping? Not returning books you have borrowed.

What two buildings does every person possess? Two temples.

What kind of a plant is it that never learns from experience? The evergreen.

Why is a pretended illness like wine? Because it is sham pain (champagne).

What has teeth, but never bites; is found in every home; everybody uses it? Don't you know? Why, it's a comb.

How do you make chickens good fighters? Feed them on scraps. Where did Noah strike the first nail in the Ark? On the head.

Off the northwest coast of Australia there used to be a beautiful island 13 miles long. But it gradually sank until it disappeared entirely, and at the latest reports of soundings it was found to be 50 feet below the surface of the water.

Wonderful powers of memorizing facts are possessed by a Yorkshire laborer, who has mentally stored away 31,000 items of general information.

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

Experienced Help.

The Managing Editor.—You say you've never worked on a newspaper? Why do you think you do for us? Miss Inspector.—Why! I heard you needed someone to take charge of the makeup.

A man's idea of a good memory is one that enables him to forget everything prejudicial to his own interests.

If you wish them to have thick, healthy hair through life shampoo regularly with Cuticura Soap and hot water. Before shampooing touch spots of dandruff and itching, if any, with Cuticura Ointment. A clean, healthy scalp usually means good hair.

Size 25c. Discount 15c. per doz. Taken 25c. Sold through the Dominion.

Agents: Laidlaw, 244 St. Paul St., W. Montreal.

Cuticura Soap shampoos without soap.

A Big Butter Order

Butter from the Edmonton district is in demand, and one of the largest orders ever recorded there was placed recently when Paul de Wolff of Sardin, B.C., asked Edmonton dealers to supply him with 1,000,000 pounds destined for the New York market. A million pounds order is a big one to fill, but agents at half a dozen or more central Alberta points are also being asked to assist in filling the order.

A WOMAN'S RIGHT TO GOOD HEALTH

Most troubles Afflicting Women Are Due to Poor Blood.

To every woman belongs the right to enjoy a healthy, active life; yet nine out of ten suffer from some form of bloodlessness. That is why one sees on every side pale, thin cheeks, dull eyes and drooping figures—signs of headaches, weak backs, aching limbs and uncertain health. All weak women should win the right to be well by refreshing their weary bodies with the new, rich, red blood that promptly transforms them into healthy attractive women. This new red blood is supplied by Dr. Williams' Pink Pills, which reaches every organ and every nerve in the body. Through the use of these pills thousands of women have found benefit when suffering from anaemia, indigestion, general weakness and those ailments from which women alone suffer. Among the many women who tell of the good Dr. Williams' Pink Pills have done them is Mrs. H. Hicks, Round Hill, N.S., who says: "I became very much run down in health; my blood seemed weak and watery, my strength failed, and I was so easily tired that my work was a burden. I had often read about Dr. Williams' Pink Pills and decided to try them. I can truly say that after using three boxes I found myself gaining, and under a further use of the pills all my old-time energy and vitality was restored. Out of my own experience I can strongly recommend this medicine."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Icebergs Carry Strange Freight. Icebergs sometimes carry strange freight. One of the flat-topped variety, 100 feet high was seen in mid-Atlantic bearing three vessels on its icy summit. Another, near the Banks of Newfoundland, had several Polar bears walking about on it.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Do Or Die.

Brown—Walters is crazy about etiquette. He read in a book that in the best society the wife ladies out the soup and he has given up soup. Green.—Why?

Brown.—Because he has no wife.

Wise mothers who know the virtues of Mother Graves' Worms Exterminator always have it at hand, because it proves its value.

Nothing to Fear.

Benhaw—I am afraid of a blood clot on the brain.

Mrs. Benhaw—Cheer up, it can't be a big clot.

More than 200 restaurants in Greater New York are owned and run by Chinese.

Those Haying Sick Animals SHOULD USE

Good for all throat and chest diseases, Diphtheria, Gargel, Sprains, Bruises, Cuts, Manges, Spavins, Running Sores, etc., etc. Should always be in the stable—SELL EVERYWHERE.

Cretonne Trims Muslin Apron

By Marie Belmont.

The apron of unbleached muslin is admirable for summer wear. Many of these creations are designed so that they take the place of the house dress. The model illustrated is fashioned with short sleeves and the upper part is cut long enough to blouse over the sash of cretonne. It is really a slip-over affair as the back is closed except for a small opening at the top which allows an easy exit from its enveloping folds. A band of cretonne outlines the square cut neck as well as the sleeves and pocket. A cretonne flower decorates the front.

With so thorough a preparation at hand as Miller's Worm Powders the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

Explorers Will Fare Well

Have Food Capable of Restoration to Original Taste.

If MacMillan and his six venturesome companions succeed in reaching Baffin Land in the frozen north, they probably will celebrate with a banquet on shipboard in which such delicacies as "fresh" raspberries, spinach and green corn will figure largely.

It was learned that the MacMillan party had taken along a quantity of perishable foodstuffs prepared by a new process of desiccation, which its sponsors claim, leaves the dried products capable of restoration to their original bulk, color and taste by soaking in water.

In addition to fruits and vegetables, the MacMillan party's desiccated food supply included roast beef hash, reduced to withered bits, unrecognizable fish, also capable of being made "fresh" again, and a few bowls of grass for the party's dogs and catnip for the ship's cat.

Great Britain's Chief Creditor.

A return by the treasury shows that the external debt of Great Britain on March 31 last was £1,161,563,000, compared with a total of £1,278,714,000 on March 31, 1920, and £1,364,850,000 on March 31, 1919. The total net decrease in the two years amounts to £203,287,000. Britain's chief creditor is the United States, with £972,704,000, and Canada is next with £53,339,000.

Hides Do Not Figure

A practical manufacturer assures us that the price of hides is not a factor in the cost of shoes. A prominent labor man declares that the labor cost in a pair of shoes represents only about a dollar. One must conclude that the price of an expensive pair of shoes must be caused by something like spontaneous generation.—Hamilton Herald.

In Hawaii it has been found that weeds can be kept down in sugar plantations by covering the fields with paper, which is easily penetrated by the sharp sugar cane shoots.

In some of the out-of-the-way rural districts in England, the people have a superstitious belief that ointment should never be applied with the first finger, as that finger is venomous.

A natural curiosity of Japan is the "insect bell." It is a black beetle which emits harmonious sounds like those of a little silver bell.

Improved Air Navigation

Automatic Means of Control For Commercial Airplanes.

Apparently the day is at hand when the navigation of an airplane will require no more skill and self-reliance than does the driving of an automobile. A flight has recently been made from London to Paris and back, during which, for two consecutive hours, the pilot was enabled to depend entirely upon an automatic mechanical control for everything but the actual direction by means of the steering wheel, says the August Popular Mechanics Magazine in an illustrated article.

More recently a French inventor has produced a mechanical pilot by means of which all control except the actual steering is done either automatically or by readily made adjustments. The device has attracted a great deal of attention in England, where elaborate tests are being made at both government and private aerodromes. This machine is so arranged that the pilot can retain personal control of the ailerons and elevator, as well as of the engine plant and rudder, as long as he likes, and also has the means, whenever he desires to turn over to the automatic system the control of the ailerons and elevator simultaneously, or of the ailerons alone—but not the elevator alone—and in addition he can cut out both automatic controls, and use indicators that are installed on the dashboard of the airplane cockpit as an index as regards horizontality. It is more than a means of relieving the pilot from fatigue, for, when flying through clouds or fog he need no longer fear that he is "banking" unintentionally, while for landing, the control can be set so that the machine will descend at a predetermined angle, thus removing one of the dangers of night flying.

Minard's Liniment for sale everywhere.

How Science Advances

Radioscopic Examination of Mind As Well As Body.

Its name, "phrenoscope," exactly describes a new French X-ray instrument to those who have a knowledge of the dead languages, for the term is composed of two Greek words meaning a view or survey of the mind or diaphragm, and this is precisely the purpose of the instrument, says the August Popular Mechanics Magazine in an illustrated article. It makes possible a radioscopic view of any opaque object, and in the case of the human body, enables one to see distinctly the diaphragm—the membrane that separates the chest from the abdomen, dividing thus the body into two compartments. This membrane, although very slender, is muscular, and it vibrates constantly under the action of respiration. It is claimed that these movements of the diaphragm act in union with the mind or brain, and therefore a study of the diaphragm in this manner makes possible an analysis that is mental as well as physical. Indeed, the French originator of the instrument asserts that he can read the character of any human being, when placed behind the screen of his instrument so that the diaphragm is fully exposed to view. That there is some basis for this assertion has been definitely proved by a number of actual tests that were very successful.

The Endurance of Your Automobile, Truck, or Tractor

Depends not only upon the time of Lubrication, but the kind of Lubrication.

WHITMORE'S AUTO GEAR PROTECTIVE COMPOSITION

Adds 300% to Gear Life. Thousands of tests have been conducted by Lubricating experts to demonstrate the relative efficiency of various lubricants. The results of these tests conducted over many years, has fixed the choice of sixteen leading manufacturers. These manufacturers include:

The largest builder of fine cars in the world; The largest builder of trucks in the world; The largest builder of axles in the world; The largest builder of worm gears in the world.

Many lubricants contain acid. They not only fail to counteract friction, but are themselves harmful and corrosive to gear and bearing surfaces.

Whitmore's Auto Gear Compositions Contain No Acids

They are proof against heat and cannot break down or squeeze out. In the Panama Canal Emergency Dams, six million pounds rest on an unbroken film of WHITMORE'S. After an exhaustive test the U.S. Army contracted for its exclusive use. Manufactured by The Whitmore Manufacturing Co., Lubricating Engineers, Cleveland, Ohio.

Written Sixty Years Ago

Time Was Not Ripe for End of the World.

I should have felt more nervous about the late comet if I had thought the world was ripe. But it is very green yet, if I am not mistaken; and besides there is a great deal of coal to use up, which I cannot bring myself to think was made for nothing. If certain things, which seem to me essential to a millennium, had come to pass I should have been frightened; but I wasn't.

For Frost Bites and Chills.—Chills come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Work Doesn't Kill.

How much trustworthy evidence is there to show that the hurry and the overworking of modern civilization push men into premature graves? London, New York and Chicago have each a death rate very near the lowest ever known; octogenarians are more and more common, and active business men at sixty-five are so numerous that they attract no attention.—Youth's Companion.

Cost of Solomon's Temple.

According to the Right Rev. T. E. Bird, who lectured at Cambridge University, Solomon's temple, in terms of modern values, cost \$4,000,000 to build.

THE KEEPING OF POULTRY

If resident in either town or country and you wish to know how best to keep poultry and secure the most satisfactory results, consult a pamphlet treating of the subject prepared by the Dominion Poultry Husbandman, F. C. Elford, and recently issued by the Department of Agriculture at Ottawa. The pamphlet can be had free on application to the Publications Branch. It tells of how poultry can be made to pay, how the birds should be housed and fed, how they should be treated in winter and summer, how to commence keeping in a small way, the equipment that is desirable, how to choose a breed, how to hatch and rear, and how to gather, keep, or market the eggs. In short all the essentials to success in poultry keeping for home consumption or selling are clearly and explicitly explained. In the term poultry are included turkeys, geese, ducks, guinea fowl and pigeons, the raising and care of which are fully discussed. Numerous illustrations of types of birds, and of methods of housing and feeding contribute to make the pamphlet an invaluable compendium on poultry-keeping and marketing.

Personalities

Miss Smith, who has been spending her holidays with her parents here, returned to Calgary last Saturday morning.

At a recent executive meeting, encouraging reports were received from the Hospitals being operated by the Red Cross at Altario, Athabasca and Consort, and also of the one which is being built at Pouce Coupe. The Red Cross is stepping out wherever they can and is extending help to communities which are not yet ready to take advantage of the hospital schemes offered by the province.

Mr. Mitchell, surveyor, of Calgary, was in town last week surveying the cemetery and surveying for the Collingwood Municipality.

Mr. and Mrs. M. L. Chapman and baby left by auto last Thursday for an extended trip to Saskatoon, Govan and Regina.

We have been informed by the Chinook Produce Co., that they have just received another shipment of Royal Household flour.

Dr. Chandler, of Cereal, left last Saturday for a two weeks vacation at Chain Lakes.

Mr. and Mrs. D. V. Boyer, who have been visiting their daughter at Arltland, Sask., for the last month, returned Tuesday. Mr. Boyer also visited Lashburn, Lloydminster and other points in Saskatchewan.

Rev. J. P. Suttill, of Cereal, is visiting Rev. and Mrs. G. Elliott, at Irma, Alta.

Forty-one oil rigs are now operating in Alberta, and eleven more are in transit for likely fields.

Mr. J. N. B. McDonald, proprietor of the Lacombe Nursery, was in town Monday making arrangements to ship part of a car of trees to Chinook next spring. Mr. Geo. Story, Youngstown, has been appointed the local agent for the Lacombe Nursery, and anyone desiring to buy trees or plants may communicate with Mr. Story as to prices.

Mr. Frank Boyer, of Morrin, Alta., is in town this week visiting his parents.

Between 3,000,000 and 4,000,000 trees have been distributed to farmers this season from the Government Experimental farm at Indian Head, Sask.

Mr. A. G. Glendenning, who has been residing here for the last year, left this morning for Saskatoon.

Support Your Home Paper.

What's a Guarantee?

Our idea of a guarantee is that the manufacturer who gives one—which hasn't any tags and loopholes—believes in his product.

So much so that he stands ready to make good any loss suffered by the purchaser through defective material or workmanship.

It's mainly because of the guarantee that goes with them that we are selling and recommending Ames Holden "Auto-Shoes."

Of course, we know they give the cheapest mileage too—that they are dependable tires for any make of car, anywhere. But it's the guarantee that we talk about most. It's the straight and clean-cut, without time or mileage limits. It shifts our responsibility on to the manufacturer and he lives up to every letter of it. Come in and let us tell you about the guarantee that goes with

Boys Return From
Camp After a Glor-
ious Time

After four days of one grand and glorious time the Trail Rangers returned from camp on Sunday afternoon.

The boys were taken to their camping ground in cars on Thursday, and it took them only a very short time to pitch their tents. Then they went through one of the many experiences in camp life which make it exciting. One of Alberta's wind storms broke upon them in all its fury, ruining with dust the delicious morsel of bacon and eggs that they were just preparing on the camp fire. This was followed by a drizzling rain, which did not however dampen their enthusiasm with all its dampness but only added another thrill to the joys of living under canvas.

Friday was taken up with various games including shooting, running, jumping and swimming. After supper, Indian scouting took up the boys' time till twilight, when they all sat around the camp fire, singing songs, telling stories, till it was time to "roll into the blankets" for the night.

Saturday was an exciting time for the boys, for this was the day when the various events were contested. The following were the prize winners:

Foot Race—H. D. Stewart 2nd Leonard Windsor 2nd.

Swimming—Geo. Radford 1st. Arthur Woodruff 2nd, Richard Miller 3rd.

Diving Contest—David Smith 1st, Geo. Radford 2nd.

Jumping—Leonard Windsor 1st, H. D. Stewart 2nd.

Tent Pitching—Leonard Bayley, Ellerd Grant and David Smith.

Shooting—Leslie Clippsham 1st Ellerd Grant 2nd.

On Sunday afternoon a camp service was conducted by the pastor, Rev. Mr. Kettles, when a number of visitors and parents were present. The camp was then broken up and the boys brought back to town in automobiles.
